

## Software Developer Course Assessment – QAP 1

Course Name: Database Programming and Data Processing

Name: Jelliebeth Sevilla

### Instructions:

You are allowed to complete the assessment problems below in whatever way you can but please answer the following questions/points as part of your submission:

1. How many hours did it take you to complete this assessment? (Please keep try to keep track of how many hours you have spent working on each individual part of this assessment as best you can - an estimation is fine; we just want a rough idea.)

**2-3hrs a day, as I am rewatching video lectures and do some research online.**

2. What online resources you have used? (My lectures, YouTube, Stack overflow etc.)

**Our instructor Peter's video lectures and materials he sent daily, it was very helpful and organized. I also search some videos in YouTube on my own.**

3. Did you need to ask any of your friends in solving the problems. (If yes, please mention name of the friend. They must be amongst your class fellows.)

**Yes, my husband John Limon. We study together.**

4. Did you need to ask questions to any of your instructors? If so, how many questions did you ask (or how many help sessions did you require)?

**No, I didn't ask directly but I sometimes join support session & learned from my classmates questions or our instructor Peter's further explanation of the QAP.**

5. Rate (subjectively) the difficulty of each question from your own perspective, and whether you feel confident that you can solve a similar but different problem requiring some of the same techniques in the future now that you've completed this one.

**I think in my own perspective, this QAP is in average as it's not super easy and not super difficult. There were challenges we encountered on some of the questions but figured it out through research and review on lectures and some online materials.**
